8. Listing Coin Market Cap
9. Aggressive Marketing
10. Marketing Launch of our
11. Audit Applications and Reviews
12. 8k Telegram Members
13. 5k Holders

Pase 2

1. Charity Donations

2. Community / Team Building
3. Giveaways
4. 30k Twitter Followers
5. 30k Telegram Group Members
6. Ongoing paid advertising
7. 10k Holders

pase 3

1. RagingBull Swap
2. Listing on Major Exchanges
3. Influencer Marketing Push
4. Launch of Merchandise
5. Further Partnerships
6. NFT and Games
7. 20k Telegram Member
- 8-Store metaverse

Initial introduction of the project

With the creation and creation of Metaverse projects and virtual worlds, and with the future prediction that today's phones will become smart glasses, these worlds and games will become more and more.

In this new world, there are lands that are expensive today, even more valuable than real estate, and even sees countries and companies looking to build embassies or offices in Metaverse.

Now the maker of this token, who created the project under the pseudonym of the Raging Bull, is building a decentralized store with a team of 15 people, in which the materials, land, NFTs and other equipment that can be bought and sold in this network can be found in one place. And bought and sold a store

It also gives people the ability to sell what they get

in Metaverse at auction.

This store allows you to have your assets in your wallet in a decentralized manner without registration and only by connecting to Metamask or Trust Walt.

We are currently trying to enable this store for the following projects

<https://decentraland.org>

<https://www.sandbox.game>

<https://staratlas.com>

<https://app.gala.games>

<https://axieinfinity.com>

<https://enjin.io>

**Why the name of the RagingBull and the symbol
ATT**

We got angry when we saw aimless projects that just wanted to become valuable tokens, and we decided to build a project that aims to get rid of animal tokens and the main goal is to have a strong project that can have a say.

We will reach all our goals soon. Support us. This is the initial version of the project goals and we will update in the future.
